August 7, 1981

Mr. Martin Sternberg, President
Compaction Systems Corp.
1381 Oak Point Avenue
Bronx, New York 10471

SUBJECT: Combe Fill, Chester, N. J.

Dear Marty:

In spite of the fact that I was led to believe you were not using Combe Fill for disposal, I have found out by being at Parker Road early in the mornings that indeed, Compaction has been disposing in Chester for several months.

The records in the office do not show any payments to Combe from Compaction for several months and in particular the period from February 16, 1981 through August 6, 1981. During this period a total of 42 trailer loads have been dumped. I find no proof of payment for any of the 42 disposals. Allowing you the benefit of the type of wastes dumped as being Class A (even though I have reason to believe that some loads were Class B and Class D) the amount due to Combe would be 42 loads times \$1.05 per yard (30 yard trailers) which equates to \$1,323.00.

Please advise immediately whether this will be paid to us or to be taken as a credit against your Management Contract. We also expect that this oversight will have ceased and you will purchase tickets for disposal at Chester the same as our other customers.

Incidentally, you have not responded to my July 13, 1981 letter concerning the contract and the Plymouth Trailduster vehicle.

Gary Molchan has been instructed to hold up any payments to Compaction until the outstanding issues are resolved.

I trust you fully understand our position which is no different than yours would be under similar circumstances.

RECEIVED

AUG 10 1981

COMBE FILL CORPORATION

Sincerely,

COMBUSTION EQUIPMENT ASSOCIATES, INC.
